#### **DETAILED ACTION**

## Claim Objections

Claim 1 is objected to because of the following informalities: "electrodes" should be "electrode" in claim 1. Appropriate correction is required.

### Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: gate electrodes, a gate insulating film, source electrodes, drain electrodes, and semiconductor layer. There is no structural relationship of these elements.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2815

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Lyu (US 6025605).

Regarding claim 1, Lyu '605 discloses on figure 3I an IC card apparatus comprising gate electrode 133, a gate insulating film 135, source electrode 143a, drain electrode 143b, and a semiconductor layer 139 on a substrate 131 and wherein a patterned insulating layer 145 is located between said gate insulating film 135 and said semiconductor layer 139 except for a channel region.

#### Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in

Application/Control Number: 10/609,631

Art Unit: 2815

scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection

based upon 35 U.S.C. 101.

Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of

claim 1 of prior U.S. Patent No. 6593977 B2. This is a double patenting rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Joseph Nguyen whose telephone number is (571) 272-

1734. The examiner can normally be reached on Monday-Friday, 7:30 am- 4:30 pm

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Tom Thomas can be reached on (571) 272-1664. The fax phone number for

the organization where this application or proceeding is assigned is (703) 872-9306 for

regular communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703) 308-

0956.

JN

July 30, 2004.
